"Adam" lemon

This variety originated from a clone recovered by micrografting the Adamo cultivar selected at the Istituto Sperimentale of Acireale (CT).
The plant is fairly remontant and quite vigorous with few thorns and assurgent growth. The seedless, elliptic fruit holds fairly well on the tree, even when fully ripe. It has medium-thick, pebbled rind and very juicy, pale yellow flesh.

Category: Citrus
Families: Rutaceae
Genus: Citrus
Species: limon "Adamo"
Geographical Area of Origin: Mediterranean Europe
Climatic Zones: Mediterranean: South and islands, hills. USDA 10 a
Habit: Tree
Leaves: Evergreen
Colore Foglie: Verde
Flowering Period: Marzo / Aprile
Flower: Simple flower
Colore Fiori: Bianco
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Low / little water / Medium
Light Exposure: Medium shade / Half shade / Full light / Full sun
Form: Tree
Fruiting Period: Gennaio / Febbraio / Marzo / Ottobre / Novembre / Dicembre
Colore Frutti: Giallo
Parfumed: yes
