The "Femminello White Blossom" lemon

This is probably a vegetative mutation of the Femminello Comune variety, known since ancient times and still widely grown in Sicily today.
This particularly productive cultivar differs from the others in both the colour of its flowers, which are white, and its young shoots, which are an attractive pale green, like those of the orange, rather than the typical purplish colour.
The tree is fairly vigorous, with elliptic leaves with a slightly rounded tip, and sometimes thorns on the branches. The medium-sized fruit is elliptic with a rounded base and thick, pale yellow rind. The leaves tend to drop if the temperature falls close to freezing point.

Category: Citrus
Families: Rutaceae
Genus: Citrus
Species: limon "Zagara Bianca"
Geographical Area of Origin: Mediterranean Europe
Climatic Zones: Mediterranean: South and islands, hills. USDA 10 a
Habit: Tree
Leaves: Semi-evergreen
Colore Foglie: Verde
Flowering Period: Marzo / Aprile
Flower: Simple flower
Colore Fiori: Bianco
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Low / little water / Medium
Light Exposure: Medium shade / Half shade / Full light / Full sun
Form: Tree
Fruiting Period: Dicembre / Novembre / Marzo / Febbraio / Gennaio
Colore Frutti: Giallo

Parfumed: yes
