"Femminello Carrubaro" lemon

This variety is believed to be a Sicilian spontaneous mutation of the Femminello Comune lemon.
Its name is derived from carrubo, the Italian name for the carob plant (Ceratonia siliqua L.), which is fairly common in Sicily and which it resembles in its characteristic clusters of fruit and flowers and the bright purplish colour of its young shoots.
The plant is very vigorous with assurgent growth and an irregular canopy. It is remontant and highly productive. The leaves are deep green, while the buds and fruit are bright purple when young.

Category: Citrus
Families: Rutaceae
Genus: Citrus
Species: limon "Carrubaro"
Geographical Area of Origin: Mediterranean Europe
Climatic Zones: Mediterranean: South and islands, hills. USDA 10 a
Habit: Tree
Leaves: Evergreen
Colore Foglie: Verde
Flowering Period: Aprile / Febbraio / Marzo
Flower: Raceme
Colore Fiori: Bianco
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Low / little water / Medium
Light Exposure: Medium shade / Half shade / Full light / Full sun
Form: Tree
Colore Frutti: Giallo
Parfumed: yes
