Aniseed boronia

Boronia crenulata, commonly known asï aniseed boronia, is a plant in the citrusï familyï Rutaceaeï and isï endemicï to theï south-westï ofï Western Australia. It is an open-branched shrub, often trailing between other plants, has strap-like leaves and pink to purple-red, four-petalledï flowers in winter and autumn.
*Boronia crenulata*ï is a shrub which grows to a height of about 0.25 1.2ï m (0.8 4ï ft) and has weak, thin stems which often trail between other plants.ï The flowers are pink to reddish and are scattered singly or in small groups in leafï axilsï or at the ends of the stems.ï
This boronia occurs in a broad area of the south-west of Western Australia in theï Avon Wheatbelt,ï Esperance Plains,ï Geraldton Sandplains,ï Jarrah Forest,ï Mallee,ï Swan Coastal Plainï andï Warrenï biogeographic regions. It grows in a range of soils, from clay to limestone and from swampy coastal areas to the margins of salt lakes and rocky outcrops.

Category: Outdoor flowering plants
Families: Rutaceae
Genus: Boronia
Species: crenulata
Geographical Area of Origin: Oceania
Climatic Zones: Sub-tropical, USDA 10 b (Southern Italy and islands)
Habit: Shrub
Leaves: Evergreen
Colore Foglie: Verde
Flowering Period: Febbraio / Marzo / Aprile
Flower: Simple flower
Colore Fiori: Viola
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Medium
Light Exposure: Full light / Full sun
Form: Grown as shrub / bush

Colore Frutti: Marrone 
Parfumed: yes
