Dipladenia

The Sundeville are commercial hybrids (Mandevilla sanderi) more resistant to full light and low temperatures.ïWoody vine of evergreen sarmentose shrub, with stems which can be 4 metres tall, it shows oblong or elliptical leaves of a glossy dark green colour, long up to about 10 cm; the terminal or axillar inflorescences carry 3-4 funnel-shaped white flowers with yellow throat, slightly perfumed, with a diameter of 6-8 cm.ïPlant which can be cultivated in tropical, subtropical and, marginally, warm-temperate climates areas, as it does not bear temperatures around the 0ï C, elsewhere it can be cultivated in pot, in order to be sheltered in winter. It prefers an exposition in full sun or slightly shaded and acid or neutral soils, well drained and kept humid.

Category: Outdoor flowering plants
Families: Apocynaceae
Genus: Mandevilla
Species: spp
Geographical Area of Origin: South America
Climatic Zones: Tropical USDA 11
Habit: Shrub-climber
Leaves: Evergreen
Colore Foglie: Verde
Flowering Period: Marzo / Aprile / Maggio / Giugno / Luglio / Agosto / Settembre / Ottobre
Flower: Tubular
Colore Fiori: Rosa ï Bianco ï Rosso
Favorite soil: Sub-acid / medium acid / Middle-Dough / Medium soil
Water needs: Aboundant water / Medium
Light Exposure: Medium shade / Half shade / Full light / Full sun
Form: Espalier / Pyramid / Flower pot / Double arch shaped / Basket / Grown as shrub / bush
Parfumed: yes
